

The Fundamentals of Wireless Local Area Networks (LANs) – Aligned to Cisco Wireless LAN Support Specialist

Cisco Industry Certification Information

Cisco certification ensures high standards of technical expertise. Achieving Cisco certification-at any level-means joining the ranks of skilled network professionals who have earned recognition and respect in the industry.

Cisco Wireless LAN Support Specialist

As organizations adopt wireless LAN technology to gain the competitive advantages of an increasingly mobile and productive workforce, they need qualified professionals who can design, install, support, and operate a wireless solution. The Cisco Wireless LAN Support Specialist indicates significant knowledge of relevant factors involved in deploying Cisco Wireless LAN solutions.

Cisco Wireless LAN Specialists:

- Understand radio technologies associated with WLAN 802.11 standards
- Understand WLAN and bridge topologies and applications
- Can configure WLAN products including access points, bridges, client devices and accessories
- Can explain Aironet software and management features
- Can configure various security methods for Wireless LAN environments
- Understand basic antenna theory
- Understand how to perform a site survey covering WLAN topology and design
- Understand vertical market deployment and challenges including equipment utility and cable awareness
